

Simran Sheth
CPSC 498 Senior Project
Progress Report – November 25th, 2018

What I planned to do:

- Update presentation for mid term report
- User can log in and stay logged in

How it went:

- I worked on my presentation to reduce clutter etc. from slides
- I watched videos on how to have new pages on the app UI set up

What I learned:

- How to have new pages after existing pages on the app

What issues I ran into:

- Time shortage – need about 36 hours a day

What I did not do:

- I was unable to successfully have a user stay logged in.

What I plan to do over the next 2-4 weeks:

- Have to set up users to be able to stay logged in
- Will also have the next page post logging in ready

Sorry for being unable to accomplish much, these couple weeks were very busy. I will compensate in winter break for the lost time.
